3.28(a)(1)

Primary enclosures.

Multiple rooms had stainless steel cages with damaged rims on water line access ports, resulting in sharp metal edges the animals can reach. Guinea pigs may chew and pull on protrusions and sharp edges of the ports, causing more damage to cages and possibly injuring their mouths. Primary enclosures must be maintained in good repair to protect the animals from injury.

Correct by November 5, 2022.

This inspection and exit interview were conducted with the facility representatives.
