Certificate: **14-B-0053**  
Site: 001  
Joseph Gentile

Type: ROUTINE INSPECTION  
Date: 23-SEP-2025

---

**2.75(b)(1)** Repeat

**Records: Dealers and exhibitors.**

There were no disposition records available for 1 hedgehog, 1 cockatiel, 1 parakeet, and 2 red-rumped parrots that have left the facility since the previous inspection. Additionally, there were no acquisition records available for 2 cockatiels that were present at the time of the inspection. Although the licensee purports that these animals are or were present for boarding, they are still regulated animals under the provisions of the Animal Welfare Act (AWA). Failure to maintain adequate records of acquisition and disposition prevents APHIS officials from verifying that the movement of animals is compliant with the AWA. The facility must make, keep, and maintain records which fully and correctly disclose the name and address of the person from whom the animals were acquired or to whom the animals were disposed, USDA license number (if applicable) or driver's license number, the date of acquisition or disposal, the species, and the numbers of the animals.

**3.125(c)**

**Facilities, general.**

At the time of the inspection, there was a bag of pellets used to feed chinchillas that was open and stored on the floor of the facility. Although there was no evidence of contamination, storing food in this manner does not adequately protect it from spoilage, molding, or vermin. The facility must ensure that it stores food in a manner that provides sufficient protection from deterioration, molding, and contamination by vermin. This was corrected at the time of the inspection. To remain corrected after September 23, 2025.

This inspection and exit interview were conducted with a facility representative.
