3.1(a)

HOUSING FACILITIES, GENERAL.

*** The licensee recently replaced several sections of wood frame and supports for the primary enclosures. A few enclosures have wire mesh that is not secured to the frame near the door which is now protruding into the enclosure and creating a gap between enclosures. These sections need to be secured so they are not protruding inward for the safety of the dogs.

3.2(d)

INDOOR HOUSING FACILITIES.

*** The floors in the whelping building need to be resealed. Several sections of the floor in front of the enclosures have paint that is chipped and peeled away which allows water to seep into the wood floor. These floors need to be repainted so they are sealed and impervious to moisture to facilitate cleaning and sanitization of the whelping area.

Correct by: Aug 29, 2014

An exit briefing was conducted with the licensee at the time of the inspection.
