JACOB KING

Type: ROUTINE INSPECTION

Date: 20-FEB-2014

3.28(a)(1)

PRIMARY ENCLOSURES.

The enclosures on the east end of the main building are beginning to deteriorate. The wire where the water enters is becoming rusted and broken to the point that it could soon cause injury to the animals. The wooden frame is no longer substantially impervious to moisture and could act as harborage for bacteria and disease. The enclosures need to be repaired or replaced to assure the continued health and well being of the animals. Correct By: 21 March 2014

Exit interview conducted with facility representative.

Prepared By: DAVID OELBERG, D V M USDA, APHIS, Animal Care
