Type: ROUTINE INSPECTION
Date: 18-JUN-2026

2.75(b)(1)

Records: Dealers and exhibitors.

A current record of rabbits on hand was not available for review during this inspection. A total of 158 rabbits were counted during this inspection. In addition, the facility is not documenting animal deaths.

Failure to maintain these records can make it difficult to assess the health of the colony by identifying animal losses by deaths or decreased numbers of animals born and to track animals being used in regulated activities to ensure their humane care and use.

The facility must maintain records containing the required information for animals which fully and correctly disclose the number of animals held, owned, and acquired or disposed of including births and deaths.
