Facilities, general.

Structural strength. There are holes around the bottom of the door frame and door in the back of the guinea pig room on the second floor. Indoor housing facilities must be structurally sound and maintained in good repair to restrict the entrance of other animals such as mice. Correct by ensuring the holes in the lower door frame and door are repaired in the guinea pig room to prevent the entrance of mice and other animals. Correct by February 3, 2021.

This inspection and exit interview were conducted with the facility representative.
