Type: ROUTINE INSPECTION
Date: 14-JUL-2023

2.40(b)(2) **Direct** **Repeat**

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

There was 1 guinea pig observed with a health condition requiring treatment in accordance with the Program of Veterinary Care or consultation with the attending veterinarian. An adult brown and white guinea pig in Pen 14 was lethargic and reluctant to move. The guinea pig was laying flat on its belly with all legs extended out. When nudged, the animal seemed unable to move or support its weight. The licensee had not observed the health condition in this animal and had not contacted the attending veterinarian.

Guinea pigs that are lethargic and not able to move may be in discomfort and have difficulty accessing food and water. The licensee must communicate with the attending veterinarian to evaluate these animals and determine an appropriate plan for diagnosis and treatment.

This inspection and exit interview were conducted with the licensee.

Additional Inspectors:

Jeffrey Shepherd, SUPERVISORY ANIMAL CARE SPECIALIST
