Site: 001
DAVID STOLTZFUS

Type: ROUTINE INSPECTION
Date: 14-JUL-2021

3.25(a)

Facilities, general.

Structural strength. There a gap approximately 2 inches wide under the door to the guinea pig building. The gap could allow rodents and insect pest to enter the animal facility. Animal facilities must be structurally sound and maintained in good repair to prevent the entrance of other animals and to contain the animals in the facility. Correct by repairing the gap under the front door to prevent the entrance of rodents and other pests. Correct by September 1, 2021.

This inspection and exit interview were conducted with the licensee.
