Type: ROUTINE INSPECTION
Date: 16-NOV-2021

3.25(a)

Facilities, general.

There is broken glass a with large hole in the window on the right side and a torn screen with a large hole on the left wall of the animal room. Large holes in windows and screens can allow insects and other pests to enter the animal facility. In additions, broken windows can cause drafts and temperatures to drop in the animal room which can lead to health problems in guinea pigs. Indoor facilities must be maintained in good repair, to protect the the guinea pigs, contain the animals securely, and restrict other animals from entering the animal room. The broken window and screen must be repaired or replaced to prevent pest and other animals from entering the animal room, and to prevent drafts and discomfort to the guinea pigs. Correct by November 21, 2021.

3.25(c)

Facilities, general.

Storage. There was an opened bag of guinea pig feed and an opened bag of shavings on the floor of the animal room. Open food and bedding can be contaminated by pests or become wet or soiled due to leakage from the watering and drainage systems. Open food supplies must be stored in containers with lids to protect supplies from contamination, spoilage, or deterioration. Licensee must ensure that open bags of food and bedding are stored properly to prevent contamination. Correct by November 20, 2021.
