Certificate: **31-A-0298**

Site: 001

DOUG HORN

Type: FOCUSED INSPECTION

Date: 15-SEP-2023

3.87(a)(3)

Primary enclosures used to transport nonhuman primates.

The transport enclosure used for 1 juvenile ring-tailed lemur had standard wire doors with wide enough openings to allow the lemur to extend its hands and arms outside the transport enclosure. Nonhuman primates that can put body parts through openings in the sides or doors of their transport crates may become injured during transport or may injure nearby animals. Correct for all future transports by using only crates that prevent the animals from putting their body parts outside of the crate. Correct by 9/30/23.

This inspection and exit interview were conducted with a facility representative. This inspection was conducted in Mt. Hope, Ohio.

Additional Inspectors:

Jonathan Tomkovitch, VETERINARY MEDICAL OFFICER

Charles Palmer, VETERINARY MEDICAL OFFICER

Lauren Murphy, VETERINARY MEDICAL OFFICER

Mark Sanderbeck, ANIMAL CARE INSPECTOR
