2.40(a)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

On April 15, 2016 the attending veterinarian conducted annual physicals on all dogs at the facility. At that time Adult Poodle Female #212 was identified as having grade 4 dental disease. Per the program of veterinary care any dog identified as having grade 3 or 4 dental disease shall be seen by the veterinarian for appropriate dental cleaning and then followed up 6 months later for a re-check. This female was nursing a litter of puppies at the time of the inspection and per the program of veterinary care the animal shall be seen after weaning her litter. This poodle was not seen by a veterinarian for a dental cleaning after the April 15, 2016 physical exam. At the time of the inspection of the Poodles teeth there was a moderate build-up of brown/yellow material on the canines and molars. Many of the cheek teeth were missing. The gums were not red or inflamed. The animal was in good body condition and all puppies in the litter appeared healthy and well nourished. The Licensee shall assure that the attending veterinarian has appropriate authority to ensure the provision of adequate veterinary care.

Licensee must contact the veterinarian for the examination of the animal previously identified as having dental disease. Documentation of the examination, diagnosis and treatment must be maintained and made available for inspection.

Correct by close of business on December 16, 2016

This inspection and exit interview were conducted with the Licensee's wife.
