Site: 001
AMMON BURKHOLDER

Type: RE-LICENSE INSPECTION
Date: 12-FEB-2026

3.13(a)(3) Repeat

Veterinary care for dogs.

The facility has not been vaccinating or sampling for parasites and other pests in a schedule approved by the attending veterinarian. Heartworm and fecal testing have been conducted in the adult dogs. However, there is not a sampling and treatment schedule for internal parasites present in the program of veterinary care. Additionally, the rabies vaccination has not been administered to the dogs. Failure to vaccinate dogs for deadly and contagious diseases and to conduct sampling and treatment for parasites and other pests in accordance with the attending veterinarians approved schedule can expose the animals to increased disease risk and can delay treatment. The licensee must ensure that vaccinations for contagious and/or deadly diseases of dogs (including rabies, parvovirus, and distemper) and sampling and treatment of parasites and other pests (including fleas, worms, coccidia, giardia, and heartworm) in accordance with a schedule approved by the attending veterinarian are followed.

This is a 1st Re-License Inspection for a Class "A" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by 13-April-2026 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
