3.1(c)(3)

Housing facilities, general.

The walls on several primary enclosures are dirty and require cleaning. These walls have a build-up of brown organic material and stains. These walls must be spot cleaned daily to reduce potential disease hazards and to satisfy accepted husbandry standards. Correct this by ensuring all surfaces in contact with the dogs are spot cleaned daily.

3.1(a)

Housing facilities, general.

Two primary enclosures housing adult dogs have areas of walls around the inside doggy doors that have been chewed or clawed. These areas must be replaced or repaired to ensure the walls remains structurally sound and are in good repair. These areas also make cleaning and sanitizing of the walls more difficult. Correct this by repairing or replacing these areas and ensure all housing facilities are constructed and maintained so they are structurally sound and in good repair.
