Blossom Valley Pups

Type: ROUTINE INSPECTION

Date: 12-JAN-2023

3.13(a)(3)

Veterinary care for dogs.

The adult dogs have not been vaccinated for rabies and they have not been sampled for fecal parasites in accordance with a schedule approved by the Attending Veterinarian. Not having the adult dogs vaccinated against rabies and sampled for fecal parasites doesn't ensure they are protected against various diseases or parasites that could infect them. All adult dogs must be vaccinated against rabies and sampled for fecal parasites. Correct by 2/9/23.

This inspection and exit interview were conducted with the Facility Representative.

End of report.
