Type: ROUTINE INSPECTION
Date: 22-JAN-2026

3.127(d) Repeat

Facilities, outdoor.

The facility has one enclosure housing five grey squirrels and one fox squirrel that is less than three feet from the perimeter fence. The enclosure is approximately 6 inches away from the perimeter fencing. Failure to provide an appropriate perimeter fence may result in animal escape or allow persons or other animals to interact with the regulated animals. All housing facilities for regulated animals must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized person out. Fences less than 8 feet high for potentially dangerous animals, such as but not limited to, large felines (e.g., lions, tigers, leopards, cougars, etc.), bears, wolves, rhinoceros, and elephants, or less than 6 feet high for the other animals must be approved in writing by the administrator. It must be of sufficient distance from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals or person outside the perimeter fence. Such fences less than 3 feet in distance from the primary enclosure must be approved in writing by the Administrator. Correct by ensuring that all species requiring a perimeter fence are enclosed with an adequate perimeter fence or obtain an approved variance.

This inspection and exit interview were conducted with a Facility Representative.
