Type: ROUTINE INSPECTION
Date: 26-MAR-2014

3.2(b)

INDOOR HOUSING FACILITIES.

When entering the indoor building, the inspector noted a strong odor. There is currently insufficient air movement with the building (which is closed against the cold) to prevent the odor. Fresh air with air movement, or increasing cleaning frequency, or maintaining a smaller population of animals within the building is needed so respiratory problems will not develop. Strong odors are both unpleasant and potentially harmful to the animals.

Correct by: 3/31/14

Inspection and exit interview conducted with Licensee.
