Type: ROUTINE INSPECTION
Date: 23-JUN-2026

3.13(a)(3)

Veterinary care for dogs.

The adult population has not been sampled for fecal parasites in the past year. The program of veterinary care requires the licensee to do fecal tests on 10% of the population annually. Not sampling the population for fecal parasites as required by the program of veterinary care doesn't ensure the population is free from the various fecal parasites that can infect them. The licensee must sample the population for fecal parasites in accordance with the written directive that is in the program of veterinary care. Correct by 7/23/26.

This inspection and exit interview were conducted with the licensee.

End of report.
