Type: ROUTINE INSPECTION
Date: 16-SEP-2016

2.50(a)(1)

TIME AND METHOD OF IDENTIFICATION.

***All dogs must have an official tag on them for identification purposes. At the time of inspection, approximately 10 dogs were not tagged. It is essential to have identification for each dog so that records can be filled out appropriately and the animal can be tracked as needed. Identification tags must be placed on the remainder of the dogs.

Correct by: September 20, 2016

3.11(d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

In the whelping room, there were a significant number of flies noted. The licensee is using fly bait to control the flies, but it is not effective enough. Insects can spread disease, contaminate food supplies by landing on excreta and then food, and may also affect the comfort of the animals. More effective measures must be taken to minimize the presence of these insect pests.

Correct by September 20, 2016

This inspection and exit interview were conducted with the Licensee.
