Type: ROUTINE INSPECTION
Date: 19-JAN-2022

3.31(b)

Sanitation.

Accumulations of rodent feces are present in various areas of the mammal room and reptile room (containing two empty hedgehog enclosures). These areas include the floor in the corner of the room where empty transport containers are stored, under the sealed animal food containers, and on the shelves, between the large plastic animal enclosures. Rodent feces can harbor diseases. Clean the feces from these areas.

Correct by: 1-26-22

3.31(c)

Sanitation.

The presence of rodents was apparent as accumulations of rodent feces were present in various areas of the mammal room and reptile room (containing two empty hedgehog enclosures). These areas include the floor in the corner of the room where empty transport containers are stored, under the sealed animal food containers, and on the shelves, between the large plastic animal enclosures. The facility has a rodent control program in place, but it is not effectively controlling the population of wild rodents. Rodents can carry diseases that affect other animals. Establish an maintain an effective rodent control program.
