Site: 001
DELMAR HOCHSTETLER

Type: ROUTINE INSPECTION
Date: 23-AUG-2021

2.76(a)(1)

Records: Operators of auction sales and brokers.

The licensee has an intact female yard/farm dog. This female golden retriever is not listed on the APHIS Form 7005. This female dog has had 7 puppies that are also not listed on the APHIS Form 7005.

Every operator of an auction sale or broker shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning each animal consigned for auction or sold, whether or not a fee or commission is charged:

The name and address of the person who owned or consigned the animal(s) for sale;

Records must be kept to ensure animals are being accounted for and also to allow tracking and tracing to be completed for all animals acquired and sold in case of a disease outbreak.

To be corrected by close of business today, 8/24/2021.

3.1(a)

Housing facilities, general.

Received by Title: Licensee

Date:
05-NOV-2021

Inspection Report

The licensee is not keeping the intact female farm/yard dog contained. This female dog had 7 puppies who are also not contained.

Housing facilities must be kept in good repair, and they must protect the animals from injury, contain the animals securely, and restrict other animals from entering.

If animals are not contained, they can be injured or harmed by other animals. The licensee must ensure housing facilities for dogs contain the animals securely.

To be corrected by close of business tomorrow, 8/25/2021.

3.1(e)

Housing facilities, general.

There is an open bag of dog food on a stand next to the unopen bags of dog food.

All open supplies of food and bedding must be kept in leakproof containers with tightly fitting lids to prevent contamination and spoilage.

Keep open bags of food in containers with lids to prevent contamination by insects, rodent, and birds. Contaminated feed can lead to sickness and disease of the animals it is fed to.

To be corrected by August 25, 2021

3.3(e)(1)

Inspection Report

Sheltered housing facilities.

The indoor and outdoor cement floors of the facility were sealed prior to pre-license inspection in October. The sealer has worn off, and the cement is no longer impervious to moisture. Spilled water from the water buckets was noted to sink into the cement.

The following areas in sheltered housing facilities must be impervious to moisture:

Indoor floor areas in contact with the animals;

Outdoor floor areas in contact with the animals, when the floor areas are not exposed to the direct sun, or are made of a hard material such as wire, wood, metal, or concrete.

Cement sealer needs to be applied as often as necessary to maintain the floors so that they do not soak up water, feces, and urine. Sealer maintains the floors so that they can be properly cleaned and sanitized to prevent odors, and disease.

To be corrected by August 31, 2021

3.10(a) Direct

Watering

The licensee has two water buckets for the group housed puppies to drink from. Both water buckets need to be cleaned.

The first water bucket has stuffing from a toy, plant material, and dirt in the bottom of it. The second bucket is so dirty with brown organic material that the bottom of the bucket is hard to see. Temperatures have been in the mid to upper 80's with dew's in or near 70.

All water receptacles shall be kept clean and sanitary.

Inspection Report

Clean the buckets as often as necessary to provide clean, potable water to the puppies. Clean water is essential for the health and comfort of the puppies.

To be corrected by August 25, 2021

This inspection and exit interview were conducted with Licensee.
