Type: ROUTINE INSPECTION
Date: 10-JAN-2022

3.1(a)

Housing facilities, general.

-Enclosure #24 has a hole in the floor that is about 5 inches by 3 inches. This is an area where soiled material can get stuck and not allow cleaning and could be an area that could cause injury to dogs. Ensure that the floor is repaired and is solid where dogs are housed.

Correct by 1/14/2022.

-The divider by enclosure #31 was loose and pushed to one side, leaving a gap of about 4 inches. A representative returned it so that a gap was no longer there, but it needs secured. A loose divider might cause or allow dogs to get in with the neighboring enclosure. Ensure that this divider is secured and safe for the dogs.

Correct by 1/12/2022.

-During records review, an adult dog in the back room was seen jumping into the aisle and then back into its enclosure. Dogs that are able to get out of their enclosure could get injured or injure other dogs. Ensure that the enclosure for this dog is adjusted so that it does not get out within the room.

Correct by 1/14/2022.

Inspection Report

3.13(a)

Veterinary care for dogs.

The program of veterinary care (PVC) does not have instructions for deworming adult dogs (how often, product, and how much to give) and lacks a plan for blood and intestinal parasites testing. A plan for deworming and parasite testing is important for adult dogs to ensure the overall health of the kennel. Ensure that the PVC has an adult deworming plan and plan for blood and intestinal parasite testing.

Correct by 1/28/2022.

This inspection and exit interview were conducted with facility representatives.
