JUNIOR YUTZY

Type: ROUTINE INSPECTION
Date: 14-JUN-2023

2.50 Repeat

Time and method of identification.

The facility had update ID tags and acquired new chain collar material, however at least 17 dogs were observed to not have their ID tags. The licensee said that the new material has been breaking. Lack of ID tags can make tracking husbandry and health conditions of each dog difficult. Ensure to obtain and affix ID's with a collar made of material generally considered acceptable to pet owners as a means of identifying their pet dogs.

2.75(a)(2)

Records: Dealers and exhibitors.

The facility APHIS 7005 has not been updated to reflect 5 new adult dogs in the kennel. APHIS 7005 must be maintained up to date to reflect the animals that are in the facility and can be important if animal tracking needs to be done. Ensure to update APHIS 7005 with all current animal information and maintain it at all times to reflect animals on hand.

***Correct by June 28, 2023.

3.11(a) Repeat

Cleaning, sanitization, housekeeping, and pest control.

Indoor areas were clean and the majority of outdoor runs were clean, however 2 outdoor runs on the west side of the building had more than one day's amount of waste material on the floor. Lack of daily spot cleaning of dog waste can increase disease and pest hazards for the dogs. Ensure to make daily removal of waste in areas that dogs can contact it (including outdoor runs) part of the daily chore routine.

This inspection and exit interview were conducted with a facility representative.
