Customer ID: **501876**  
Certificate: **35-A-0405**  
Site: 001  
Junior Yutzy

Type: ROUTINE INSPECTION  
Date: 28-JAN-2026

---

**2.40(b)(3) Direct**

**Attending veterinarian and adequate veterinary care (dealers and exhibitors).**

Male red poodle #1653 had a moderate amount of tartar and his lower front incisor and an upper right premolar were loose to the touch. These dental problems were pointed out to the licensee during inspection and hasn't been reported to the attending veterinarian. Untreated dental problems can cause discomfort and cause additional health problems in dogs. Ensure that this dog is seen by the attending veterinarian (or another licensed veterinarian) for evaluation and treatment. \*\*\*Correct by 2/4/2026.

**2.50 Repeat**

**Time and method of identification.**

Dog 1653 did not have his tag; per licensee it has been lost. Dogs must have official identification which can be important for animal health tracking. Ensure that each dog has an official tag affixed as required.

**3.11(a) Repeat**

**Cleaning, sanitization, housekeeping, and pest control.**

Outdoor runs are not getting a daily spot clean to remove excreta. Inadequate daily spot cleaning can cause a build-up of excreta and increase risk of health problems. Ensure that daily routine of daily spot cleaning is in place to prevent a build-up of excreta on surfaces that dogs touch.

**3.13(a)(2)**

**Veterinary care for dogs.**

The last recorded head-to-tail physical exams (wellness checks) by the attending veterinarian were Oct 2023 at the facility. A call to the AV to verify if updated physical exams have been completed was not returned, however the licensee thinks the last physical exams were what is in the records. Yearly head-to-tail physical exams by the attending veterinarian help ensure that each dog is healthy. Ensure to contact the attending veterinarian to get annual physical exams completed as required. \*\*\*Correct by March 2, 2026.
