3.6(a)(2)(x)

Primary enclosures.

* The feet and legs of at least three puppies were observed passing through the openings of vinyl coated enclosure flooring. Five puppies are in contact with the affected flooring located in indoor housing. Flooring that allows the feet and legs to pass through any openings could lead to possible injury and affects the daily activity and mobility of the puppies. The licensee must ensure that all flooring does not allow any feet or legs to pass through any openings in the flooring. Correct by 6/9/21

This inspection and exit interview done on 5/26/21 were conducted with the licensee.
