

Inspection Report

Kaskie Farm Inc
3081 Chestnut Ave
Rock Valley, IA 51247

Customer ID: **41350**
Certificate: **42-A-1313**
Site: 001
KASKIE FARM, INC.

Type: ROUTINE INSPECTION
Date: 16-FEB-2017

3.1(c)(2)

HOUSING FACILITIES, GENERAL.

* An enclosure, housing two adult dogs, had wood particular board from the primary fencing. This wood board was excessively chewed and scratched. This wood surface cannot be properly cleaned or sanitized. As a result, the disease hazards can increase for the dogs.

For the prevention of disease hazards to the animals, all surfaces must be maintained on a regular basis and kept in good repair for proper cleaning and sanitation.

To be corrected by, 2-March-2017.

3.1(c)(3)

HOUSING FACILITIES, GENERAL.

* The dog doors for six enclosures, housing 10 adult dogs, had an accumulation of brown to black grime or debris on their surfaces. The door inserts and area around some of the dog doors had an accumulation of brown to black grime or debris. This indicates daily spot-cleaning is not taking place and could increase the disease potential for the animals.

All surfaces must be spot-cleaned and disinfected regularly for the prevention of an accumulation of waste or grime. This will decrease the disease hazards for the dogs.

To be corrected by, 21-February-2017.

3.6(a)(2)(i)

PRIMARY ENCLOSURES.

* One enclosure, housing one adult dog, had wire used to fasten the panel divider to the back wall. This wire had sharp protruding points. The points were protruding into the enclosures at approximately eye level of the dog in normal standing position. These points could cause injury to dog.
