Date: 17-SEP-2026

3.6(a)(2)(x)

Primary enclosures.

Two enclosures housing nursing dams and their puppies had 1 inch by 1 inch plastic coated wire flooring. One enclosure housed a schnauzer dam and 6 puppies and the other housed 4 teddybear puppies and their dam. The inspector observed one schnauzer puppy and one teddybear puppy's feet passing through the flooring. Flooring that allows dogs' feet to pass through may lead to injury and cause discomfort, pain, or mobility issues. Primary enclosure floors must be constructed and maintained so that they protect the dogs' feet and legs from passing through the flooring.
To be corrected by: 21-September-2026
