### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A female Boston Terrier, "Sandy" USDA tag no. 189, was seen holding her left hind leg up off the ground while standing and moving. Licensee stated that the dog had cut her foot while running and playing in an outdoor enclosure. Physical examination of the bottom of the dog's foot revealed that the pad of one toe had a deep laceration running down the middle of it. The licensee had isolated this dog from other animals and was self-treating the wound with Vetericyn spray and Nitrofurazone. This dog has not been evaluated by a licensed veterinarian. Lacerations can cause pain and discomfort to the dog as well as lead to other health problems. This dog must be evaluated by a licensed veterinarian for proper diagnosis and treatment plan. This diagnosis and treatment plan must be documented and made available to the inspector upon request.

Correct by: May 08, 2015

### 3.1(c)(1)(2)

#### HOUSING FACILITIES, GENERAL.

In one outdoor enclosure containing two dogs, the back wall of the enclosure is constructed of sheets of metal. One of the pieces of metal has broken and the edges are bent into sharp points and jagged edges at the level of the dogs. Sharp points and jagged edges could pose an injury risk to the dogs. All enclosures must be kept free of sharp points and jagged edges that may injure the dogs.

Correct by: May 18, 2015

### 3.1(f)

#### HOUSING FACILITIES, GENERAL.

In one outdoor enclosure containing two dogs, the floor is constructed of concrete. This concrete has cracked and broken resulting in a large hole in the flooring and this hole is full of water from recent rains. Standing puddles of water in the enclosures may result in the dogs becoming wet. Standing puddles of water must be drained or
