LORELEI JENNINGS

Type: ROUTINE INSPECTION

Date: 15-JAN-2016

3.11(a) REPEAT

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The outdoor runs being used by at least 20 dogs have an excessive accumulation of animal waste, snow and ice in them. The feces is mixed with snow and ice on the ground surface of the enclosures. Most of the dogs have to walk on the packed snow and feces to get from one end of the enclosure to the other. The licensee stated that the pens were cleaned a couple days ago. The licensee also stated the snow, ice and inclement weather has affected the frequency in which the outdoor runs are cleaned.

Excessive accumulations of animal waste in the primary enclosures can increase disease risks and can result in the dogs becoming soiled. The licensee must ensure that excreta is removed from all primary enclosures on a daily basis or more often if needed.

Exit briefing conducted with the licensee.
