PALO, IA 52324

Customer ID: **10205**
Certificate: **42-A-1637**
Site: 001
NANCY KINDRED

Type: ROUTINE INSPECTION
Date: 14-JUN-2021

3.131(a)

Sanitation.

There is an excessive accumulation of feces in the two bear enclosures resulting in the majority of the floor being covered in excreta. According to the representative it had been a long time since these enclosures had been cleaned. Excessive excreta can contaminate the animals and increase disease hazards. These enclosures must be cleaned on a more regular basis. Correct by 15 June 2021.

This inspection and exit interview were conducted with facility representatives.
