RODNE KELLEY

Type: ROUTINE INSPECTION
Date: 29-SEP-2015

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

In the "main kennel" there were five sheltered enclosures housing eleven dogs that had a build-up of feces underneath the wire mesh in outdoor part of the enclosures. The odor was apparent when entering the area and the licensee state it had been three to four weeks since it was last cleaned. The build-up of feces can cause disease hazards and attract pests and the odor can affect the lungs and breathing of the dogs.

The licensee must clean as often as necessary to prevent the accumulation of feces to reduce disease hazards, pests, insects, and odors.

TO BE CORRECTED BY: OCTOBER 1, 2015

3.11(b)(2)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

In the building housing cats there are two enclosures housing four cats that had a build-up of organic material on the resting shelves. The accumulation of dirt and excreta can cause disease hazards.

The licensee must clean and sanitize used primary enclosures at least once every two weeks with a method prescribed in paragraph (b)(3) of this section, and more often if necessary to prevent the accumulation of dirt, debris, food waste, excreta and other disease hazards.

TO BE CORRECTED BY: OCTOBER 1, 2015

The inspection and exit briefing were conducted with the licensee.
