Customer ID: **33428**

Certificate: **43-A-4667**

Site: 002

OSAGE KENNELS L L C

Type: ROUTINE INSPECTION

Date: 22-JUN-2015

3.1(c)(3)

HOUSING FACILITIES, GENERAL.

(c)Surfaces. (3) Cleaning.

***Within the outdoor portion of the facility, there were shelter units for the hutch-style enclosures which had a buildup of dirt and grime as well as some white mold-like material. Two of the shelter units contained some fecal-like material covered with a thick amount of the white mold-like material. Some of this white mold-like material was observed on a portion of the solid floor surface in these two shelters as well. A mild mildew-like odor was noted when the licensee opened up the backs of these shelter units. Most of the dirt and grime build up was noted on the solid floor surface of many of the shelter units in this portion of the facility. A buildup of dirt and grime as well as white mold-like material can increase the risk of disease hazards to the dogs. The licensee must ensure that hard surfaces with which the dogs come in contact are spot-cleaned daily and sanitized in accordance with 3.11 (b) of this subpart to prevent the accumulation of excreta and to reduce disease hazards. To be corrected by: June 23, 2015.

The inspection and exit interview were conducted with the licensee.
