Kimberley Toombs
293 Mountain Ash Lane
Poplar Bluff, MO 63901

Customer ID: **39093**

Certificate: **43-A-5871**

Site: 001

KIMBERLEY TOOMBS

Type: ROUTINE INSPECTION

Date: 27-JUN-2017

3.3(b)

SHELTERED HOUSING FACILITIES.

Upon entry to the sheltered portion of the kennel an excessive odor of fecal waste and urine was encountered. The kennel has two exhaust fans and an air conditioner. The air conditioner was operating and maintaining an acceptable level of temperature and humidity but the exhaust fans were not functioning properly to eliminate excessive odors from the interior of the building. Inadequate ventilation not only contributes to odor issues but can also lead to excessive ammonia levels that would pose respiratory health risks to the exposed dogs and puppies. The exhaust fans must be made functional and operated to adequately eliminate odors from this building. To be corrected by: 07/05/17

This inspection and exit interview were conducted with Curt McGruder-ACI.
