Type: ROUTINE INSPECTION

Date: 29-JAN-2026

3.1(e)

Housing facilities, general.

Inside the building there were 2 unopened bags of dog food and 1 bag of shavings for bedding that was directly on the floor. The food and bedding could come into contact with cleaning solution or water or potentially rodents and become contaminated. When placed on the floor, it prevents the cleaning under the bags. Supplies of food and bedding must be stored in a manner that protects the supplies from spoilage, contamination, and vermin infestation. The supplies must be stored off the floor and away from the walls, to allow cleaning underneath and around the supplies.

Correction date: 29 January 2026

This inspection and exit interview were conducted with a facility representative.
