Box 640
Vanzant, MO 65768

Customer ID: **506118**
Certificate: **43-A-6452**
Site: 001
MARTY CLINTON

Type: ROUTINE INSPECTION
Date: 14-MAY-2026

3.11(c)

Cleaning, sanitization, housekeeping, and pest control.

Around each of the 3 buildings used for housing dogs, there are numerous tall (at least 20" tall), bushy weeds. There were 2 tall weeds at the edge of the cement pad of the for the outdoor part of the shelter building housing females with litters of puppies.

The building next to it had several of the tall bushy weeds next to the drain. The path to the cement building housing small dogs had very tall weeds (at least 6' tall) on each side of the path and up to the building. There were numerous thick tall weeds on the opposite side of the building from the entrance that touched the wall and were above the level of the bottom of the window.

The heavy growth of weeds around the buildings makes it difficult to keep the building and grounds clean and in good repair. It also makes it difficult to reduce or eliminate breeding & living areas of rodents and other pests and vermin. The licensee must remove weeds, grasses and bushes and control their growth so as to facilitate cleaning of the premises and pest control, and to protect the health and well-being of the animals.

Correction date: 20 May 2026

This inspection and exit interview were conducted with a facility representative.
