CLARK, MO 65243

Customer ID: **333857**

Certificate: **43-A-6483**

Site: 002

John Bontrager Lizzie Bontrager

Type: NEW SITE INSPECTION

Date: 12-JAN-2022

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

A female Golden Retriever ID 110 was limping on her left front foot. The limping front leg could be the result of an injury or other medical condition. The licensee must consult a veterinarian and keep medical records about this dogs' condition. Golden Retriever ID 103 was heavily matted on her rear end. Hair mats can cause discomfort and skin irritation for the dogs. The licensee must ensure all dogs are free of mats.

3.6(a)(2)(i)

Primary enclosures.

Tie wire was used to fasten the waterers and the fence panels. These tie wires caused sharp points that were protruding into the dog enclosures at the dogs level. These sharp points could injure the dogs. The licensee must ensure all enclosures are free of sharp points and edges.

3.10(a)

Watering

There was one enclosure with 5 dogs that had a empty water bucket, with no other water available. Water is important to the health of the dogs and is necessary for their well being. The licensee must ensure all dogs have water available at all times.

Inspection Report

This inspection was a site approval inspection.

This site is not ready for approval to conduct activity covered under your current Animal Welfare Act License.

Conducting regulated activities at a non-approved site is a violation of the Animal Welfare Act.

Please contact your inspector to schedule your next new site approval inspection.

This inspection and exit interview were conducted with the licensee.
