Type: ROUTINE INSPECTION
Date: 31-MAR-2022

3.10(a)

Watering

There was a Labradoodle and her 4 pups that had contaminated water. There were also two Pugs that did not have water available. The dogs drank some when presented with fresh water, The contaminated water could decrease the animals' acceptability of the water, as well as increase the risk of disease. Water is important to the health of the dogs and is necessary for their well being. The licensee must ensure all dogs have potable water available at all times.

This inspection and exit interview were conducted with the licensee.
