Type: ROUTINE INSPECTION
Date: 26-FEB-2026

3.13(a)(4)

Veterinary care for dogs.

At time of inspection a male Poodle, Rascal (9321000683400), and a male Pomeranian, Lil Man (990000008186945) were exhibiting matted hair coats. The Poodle had sheeted matting along his flanks, hind legs and midway up the back. Additional clusters of matting were also observed on the abdomen and chest.

The Pomeranian was exhibiting pendulous matting on the back of the hind legs and sheeted matting in various areas along the back starting at the base of the head. Matting can cause pain, discomfort and skin issues if left untreated. The licensee should consult the Program of Veterinary Care for guidance on a healthy and unmatted haircoat as prescribed by the attending veterinarian.

To be corrected by: 2.28.2026

This inspection and exit interview were conducted with facility representative.
