Certificate: **46-A-0368**
Site: 001
DEWAYNE & ANDREA PETERSON

Type: ROUTINE INSPECTION
Date: 24-SEP-2014

3.1(c)(1)

HOUSING FACILITIES, GENERAL.

* The wood trim around the doors going into the building have been chewed and scratched and cannot be properly cleaned and sanitized (affecting 13 dogs). Surfaces need to be able to be readily cleaned and sanitized to prevent disease hazards and promote the cleanliness of the facility.

These surfaces need to be repaired or replaced by November 1, 2014.

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

* All the primary enclosures (containing 14 adult dogs & 8 puppies) have an accumulation of hair, dirt, and grime built up on the floor, walls and enclosure sides of the inside portion of the sheltered housing. The whelping boxes in the center of the building have a layer of cobwebs and dirt covering the enclosures. The outdoor enclosures have an accumulation of more than two day's worth of feces throughout the enclosures. This type of accumulation can cause soiling of the dogs, odors, attract pests and other disease hazards.

The licensee must remove all the organic material and material waste daily or more often as necessary to prevent an accumulation of any type to reduce disease hazards, odors, prevent soiling of the dogs and allow for proper and effective sanitization procedures to occur.

To be corrected by September 26, 2014.

An exit interview was conducted with the licensee.
