5961 S E Northstar Rd
Medicine Lodge, KS 67104

Customer ID: **4124**
Certificate: **48-A-0840**
Site: 001
Jack Wortman, Lois Wortman

Type: ROUTINE INSPECTION
Date: 16-MAY-2017

3.1(a)

HOUSING FACILITIES, GENERAL.

The wires on approximately 10 divider wire panels between adjacent enclosures have deteriorated to the point that there are wire points sticking into the enclosures as well as gaps between enclosures (there are also a few divider panels between enclosures not in use at the time of the inspection that would need repair before these enclosures could be used). Dogs could be injured on the wire points, or could escape from their enclosures through these gaps. All enclosures must be kept in good repair to securely contain the dogs and protect them from injury. Correct by 20 June 2017.

3.1(c)(3)

HOUSING FACILITIES, GENERAL.

There is a build-up of oil and grime on at least 12 metal egress dog doors of the sheltered building. Surfaces that are not regularly cleaned and sanitized can harbor pathogens. Hard surfaces with which the dogs come in contact must be spot-cleaned daily and sanitized at least every two weeks to prevent accumulations of grime and reduce disease hazards. Correct by 30 May 2017.

This inspection and exit interview were conducted with facility representatives.
