Type: ROUTINE INSPECTION
Date: 19-APR-2016

3.1(a)

HOUSING FACILITIES, GENERAL.

There is a 6 inch section of the wire-front under the access gate on the outdoor portion of one enclosure that is in need of repair. This has resulted in wire points sticking into the enclosure and a hole under this gate that is large enough for a dog in this enclosure to fall through. Wire points in the enclosure could cause injury to the dogs and holes in the fence does not securely contain the dogs. All housing facilities must be constructed and maintained in good repair so they are structurally sound, protect the animals from injury and contain the animals securely. Correct by 3 May 2016

This routine inspection and exit interview were conducted with a facility representative.
