NEODESHA, KS 66757

Customer ID: **330076**

Certificate: **48-A-2152**

Site: 001

Cindy Jensen, Richard Jensen

Type: ROUTINE INSPECTION

Date: 14-MAR-2023

2.75(a)(1)

Records: Dealers and exhibitors.

* The cage card information attached to multiple enclosures containing 105 (unweaned) puppies was incomplete. The identification, breed and sex of the puppies were missing. Complete and accurate records are needed to ensure each puppy identity can be known with certainty and to facilitate the ability to trace all puppies. The licensee must maintain complete and accurate records of all puppies at their facility. Correct by 4/14/23.

3.1(c)(3)

Housing facilities, general.

* There is a mixture of dirt accumulating on the top of an estimated 20 fiberglass calf hutch enclosures. Fifty dogs are in contact with the affected surfaces located in outdoor housing. The affected area covers the entire top of the calf hutch. Cleaning of surfaces is necessary to prevent an accumulation of excreta and other disease hazards. This indicates an unsanitary living condition exists that could lead to potential disease or health risks. Surfaces which are not cleaned and sanitized properly increase the risk of disease hazards for the dogs. Cleanliness is important to the health and well-being of the animals. All surfaces of housing facilities must be cleaned and sanitized when necessary to satisfy generally accepted husbandry standards and practices. The applicant must ensure that hard surfaces with which the dogs come in contact must be spot cleaned daily and sanitized in accordance with 3.11 (B) of this sub part to prevent accumulation of excreta and reduce disease hazards. Correct by 3/16/23.

Inspection Report

3.13(a)(3)

Veterinary care for dogs.

* The licensee could not locate the last recorded date for annual heartworm, and fecal float testing for 236 adult dogs. Annual heartworm and fecal float testing are important for the health of the animals. Heartworm and fecal float testing is done to ensure that there are no active internal parasites. The licensee must ensure that all dogs are receiving vaccinations for contagious and/or deadly diseases of dogs (including rabies, parvovirus, and distemper) and sampling and treatment of parasites and other pests (including fleas, worms, coccidia, giardia, and heartworm) in accordance with a schedule approved by the attending veterinarian. Correct by 4/14/23.

This inspection and exit interview were conducted with the licensee.
