TWIN PINE FARM & EXOTICS

Type: ROUTINE INSPECTION
Date: 12-JAN-2016

3.131(a) REPEAT

SANITATION.

The primary caretaker was out of town for 3 weeks, and the outdoor exotic cat enclosures were not adequately cleaned during this time. The primary caretaker started cleaning the cages last night as evidenced by a litter box full of waste in the middle cage containing two Geoffroys cats. The first enclosure, containing four Geoffroys cats has an accumulation of old white feces in a pile next to the fencing behind a support board and a smaller pile on the metal roofed of the shelter. Cleaning of primary enclosures was cited on 7-21-15. All enclosures are to be cleaned on a more regular basis to prevent disease hazards and to prevent contamination of the animals.

Exit briefing conducted with licensee.
