Type: ROUTINE INSPECTION
Date: 28-JAN-2015

3.28(b)(3)(1)

PRIMARY ENCLOSURES.

Golden hamsters were moved a week ago into plastic cages in a slide in rack. The interior height of these cages to the top wire is five inches. The interior height of any primary enclosure is to be 5.5 inches. These 21 hamsters need to be moved to cages with have the required height. To be corrected by 2-13-15.

3.128

SPACE REQUIREMENTS.

A new cage rack system was obtained and 8 hedgehogs were placed in the plastic cages. These cages are only five inches high. The hedgehogs are 3-4 inches tall so this does not provide enough room above their heads for them to make all normal postural and social adjustments with adequate freedom of movement. They need to be moved into enclosures which provide more space above their heads. To be corrected by 2-13-15.

Exit briefing conducted with licensee.
