Type: ROUTINE INSPECTION
Date: 29-SEP-2026

3.55

Watering.

The facility is not sanitizing the water receptacles for rabbits as often as necessary. In multiple rabbit enclosures, the water bowl and reservoir contain a green to greenish brown debris or film. When the APHIS official asked how often the water receptacles are cleaned, the facility representative stated that they are cleaned approximately every 3-4 weeks.

Failure to sanitize water receptacles when dirty can lead to a build up of debris, reduced water quality, and increased risk of illness in animals. All watering receptacles shall be sanitized when dirty: Provided, however, that such receptacles shall be sanitized at least once every 2 weeks.

To be corrected by October 7, 2026.

This inspection and exit interview were conducted with facility representatives.

You may appeal all or part of any inspection report by submitting a written statement contesting the findings—along with any supporting documentation—to the Deputy Administrator. Appeals of routine, focused, or attempted inspections must be received within 21 days of report issuance as shown by the signature line of this report.

Appeals may be sent by email to AnimalCare@usda.gov.

Appeals sent by mail should be addressed to:
