HUGO ENGLISH

Type: ROUTINE INSPECTION
Date: 11-AUG-2015

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***A female shih tzu (#0A02365062) had a white opacity on the left eye that extended over the area of the pupil of the eye. There was also a yellow build-up of a thick substance around the eye. The owner stated that he did not know the dog had this condition. The owner should make a daily observation of the dogs health to be able to address their needs in a timely manner. The dogs should receive proper veterinary care from their attending veterinarian to prevent any infection or disease and to ensure good health of the animal. Correct by August 13, 2015.

3.1(c)(1)(1)

HOUSING FACILITIES, GENERAL.

** The horse panels used to divide the dogs' runs are rusted on the bottom half. The panels surfaces must be of such that allow them to be readily cleaned and sanitized or removed or replaced when worn. Any surfaces that come in contact with the dogs must be free of rust that prevents the required cleaning and sanitization. Correct by August 25, 2015.

The inspection and exit briefing was conducted with the owner.
