Type: ROUTINE INSPECTION
Date: 19-FEB-2014

2.40(b) DIRECT REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

In the kennel facility there are two adult dogs which need to be evaluated by the attending veterinarian. One of the animals is a male Yorkshire Terrier, chip # 086842024, who is thin to the point of spine and hip bones are protruding. The animal also has a large accumulation of green and gray matter on both sides of the upper gums. The other animal is a seven month old King Charles Cavalier, chip # 0A0213654, who has a wounded bloody tail tip. The animal was housed in a raised hut type enclosure and observed wagging his tail vigorously during the inspection. In the enclosure there is splattered blood on the front wall of the shelter portion. The dealer moved the animal to a larger ground enclosure during the inspection.

Affects two adults.

3.6(a)(1)

PRIMARY ENCLOSURES.

The kennel facility consists of five outdoor housing areas and one indoor whelping building. One outdoor housing area consists of raised hut type enclosures. Five of the wood shelter fronts are excessively chewed and scratched. The wooden surfaces need to be repaired and or replaced and maintained. One set of the outdoor enclosures is under a open barn. In the barn area there are four enclosures on the west side which have rusted / broken support structures. The support structures need to be repaired, replaced and maintained to contain the animals securely and protect them from injury. All primary enclosures must be designed and constructed of suitable materials so that they are structurally sound. The primary enclosures must be kept in good repair to protect the health and welfare of the animals.

Affects twenty-five adults

Correct by March 19, 2014

3.11(b)(1)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The kennel facility consists of five outdoor housing areas for adult dogs and one indoor whelping building. Though

Inspection Report

out the outdoor housing areas there are nine enclosures which contain a total of nineteen adult dogs whose food receptacles need to be cleaned and sanitized. The food receptacles have an accumulation of dark matter and an accumulation of wet food in the crevices. The water receptacles must be cleaned and sanitized to prevent contamination of the food products and to prevent illness of the animals.

Affects nineteen adults

Correct by February 24, 2014.

3.11(c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The kennel building has surfaces which need to be cleaned and maintained. In whelping building there is an accumulation dirt, hair and / or dead insects on the window seals and on the enclosure tops and divider panels. All premises including buildings and surrounding grounds, must be kept clean and in good repair to protect the animals from injury, to facilitate the husbandry practices and to reduce or eliminate breeding and living areas for rodents and other pests and vermin and to protect the health and well-being of the animals.

Affects twenty-five adults and one hundred and five puppies.
