Type: ROUTINE INSPECTION
Date: 27-OCT-2016

2.50(a)(1)

TIME AND METHOD OF IDENTIFICATION.

There were at least ten animals with no means of identification. The licensee uses an approved tattoo number. Identification is required for health management, tracking, and for facility record keeping. All animals must be identified by one of the following: 1) a collar that contains the letters USDA, a unique identifying number, and the license number; 2) a tattoo approved by USDA; or 3) a microchip that can be scanned by the licensee.

To be corrected by: November 27, 2016.

3.3(b)

SHELTERED HOUSING FACILITIES.

*****There was a very strong ammonia and waste odor inside the kennel building. This can potentially cause serious respiratory problems and distress to the animals. There must be sufficient ventilation to minimize odor and to provide for the well being of the animals. The ventilation system must be turned on more often or the inside of the kennel must be cleaned more frequently.

To be corrected by: November 10, 2016.

This inspection and exit interview were conducted with a facility representative and Jeff Baker, Veterinary Medical Officer.

Prepared By: JEFFREY BAKER, D V M USDA, APHIS, Animal Care
