Site: 001
LEE OR DESIREE BOGAN

Type: ROUTINE INSPECTION
Date: 09-JUL-2014

3.1

HOUSING FACILITIES, GENERAL.

(c)(2)

***** At time of inspection the following dog houses need to be replaced as they had been chewed on to the point they could not be properly cleaned and sanitized. The houses located in pen numbers 5,13,17,22 and the house in the pen located across from pen number 21. Several other houses are in need of repair of the surfaces on which the animals have begun to chew to prevent them from not being able to be cleaned and sanitized and needing replacement if the required repairs are not undertaken.

TO BE CORRECTED BY: 11/12/14

3.1

HOUSING FACILITIES, GENERAL.

(c) Surfaces--(1) (i)

***** At time of inspection the walls of the enclosures in Pen numbers 1 and 2 as well as the unused pen located next to the pen labeled as pen 1 are constructed of 2"x4" galvanized horse panels which has had galvanized welded wire added along a portion of the panel along the bottom. This welded wire has rusted as well as 8" to 12" of the horse panel and this wire and portion of the panel is no longer structurally sound and it can not be properly cleaned and sanitized.

The welded wire needs to be removed or replaced and the bottom portion of the horse panel needs to be removed which will make these surfaces able to be properly sanitized and the horse panels structurally sound.

***** Along the back portion of the pens located on both sides of the kennel the horse panels along the bottom 4" have rusted which prevents proper cleaning and sanitizing to take place as required. This area of the panels need to be painted or covered with a material which will allow for cleaning and sanitizing of these panels which the animals have contact with to be carried out as required to aid in disease prevention and to keep these panels structurally

3.1

HOUSING FACILITIES, GENERAL.

(a)

***** At time of inspection the following enclosures had entry gates constructed of pipe framing and chainlink fabric. The pipe framing along the bottoms of these gates are rusted and no longer structurally sound and the frame work for these gates need to be repaired or replaced so that these gates are structurally sound and keep the animals safe from injury and secure. The gates are located at pen #s 3,5,6 and 7.

TO BE CORRECTED BY: 10/11/14

This inspection and exit interview conducted by APHIS, USDA, ANIMAL CARE Personnel and the owner.

END OF REPORT.
