Type: ROUTINE INSPECTION
Date: 25-FEB-2014

3.6(a)(2)(1)

PRIMARY ENCLOSURES.

The kennel facility consists of two sheltered buildings. The second whelping building is used for whelping. On the eastern exterior of the second sheltered building there are raised wire enclosure portions. Three of the occupied raised wire exterior enclosure portions have broken wires in the floor material. The broken wires need to be repaired or replaced and maintained. The flooring needs to be repaired to protect the contained animals from injury and to protect their health and welfare.

Affects four adults

Correct by March 5, 2014

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The kennel facility consists of two sheltered buildings. The first sheltered building has indoor and outdoor ground enclosure portions. During the inspection all seven exterior enclosure portions on the first building contained more than one days waste material. The dealer stated the outdoor enclosure portions had last been cleaned approximately two weeks prior. Excreta must be removed from primary enclosures daily to prevent an excessive accumulation of feces and food waste, to prevent soiling of the dogs contained in the primary enclosures, and to reduce disease hazards, insects, pests and odors.

Affects twenty-two adults.

Correct by February 26, 2014

The inspection and exit briefing was conducted with the Dealer.
