MISTY MEANS

Type: ROUTINE INSPECTION
Date: 30-AUG-2023

3.10(a)

Watering

In three enclosures, each with one dog, there were empty water bowls, with no other water available. When water was presented, the dogs drank for 1-2 minutes. Lack of water could cause the dogs to become dehydrated or other health issues. Having potable water available continuously is important to the health of the dogs. The licensee must ensure all dogs have continuous access to potable water.
Corrected during inspection.

3.13(a)

Veterinary care for dogs.

The licensee had no documentation that the adult dogs had been vaccinated for Parvo/Distemper in the last 12 months as directed by the Program of Veterinary Care (PVC). Following the PVC and vaccinating for diseases such as Parvo/Distemper are necessary to prevent these diseases, which can cause significant harm, to include death. The licensee must follow the PVC as directed by the Attending Veterinarian for all dogs. The licensee must keep medical records for the dogs and make the records available to the inspector upon request.
To be corrected by: September 13th, 2023

This inspection and exit interview were conducted with the licensee.
